

# Guide to what domestic heating appliances you can install in Otago

**Notes**

- \*Plan Change 2 to the Regional Plan: Air for Otago became operative on 1 January 2009. It introduced Air Zone areas, which are available to download from the ORC website. Alternatively, you can obtain a copy by phone or email.
- <sup>1</sup> A woodburner or pellet burner does not include an open fire; or a multifuel heater, or a coal burning heater; or a stove that is designed and used for cooking, and is heated by burning wood.
- <sup>2</sup> Definition of Domestic Heating Appliance: A combustion appliance, with a heat generation capacity of up to 50 kW in which solid fuel is burnt for heating or cooking, and is primarily used in residential dwellings. It includes, but is not limited to, any open fire, woodburner, multifuel, pellet or coal burning heater, or cooker including coal range.
- <sup>3</sup>Definition of Cooker: Any domestic heating appliance which has an inbuilt oven and is used for cooking.
- See Otago Regional Council (ORC) and Ministry for the Environment (MfE) websites for lists of approved domestic heating appliances.
- Certain commercial premises and recognised heritage buildings may be able to apply for resource consent to install a non-complying domestic heating appliance. See the Regional Plan: Air for Otago for more detail.
