Proposed Control Measures for this Season

Please describe the rabbit control measures that will be undertaken to reduce rabbits to at or below MMS 3 on the Modified McLean Scale

Primary Control Measures – Initial knockdown

Secondary Control Measures – Methods planned to maintain numbers at or below MMS 3 long term

Areas of Property to be Treated

Please attach a map/diagram showing where on the property these rabbit control measures will be carried out

Please include:

- location of any existing rabbit fencing or natural /physical barriers
- location of any proposed rabbit fencing

Timing of Control Measures

Please specify the timetable (month and year) the control measures will be undertaken

Contractor's Details

Please specify who will be carrying out the control measures and their contact details

Plan for Following Seasons:

Please specify the follow-up rabbit control measures you will be undertaking beyond this season to maintain rabbit numbers to at or below MMS 3 over the long term

Any Potential Issues

Please outline any potential issues that may present challenges to carrying out rabbit control measures on your property, for example topography, neighbour relationships, covenants, etc.
