

The Old Clyde Plan

Note for Councils:

The planners, councillors who have not supported the old Clyde people will get the sword. They need to accept the correct change and move on. Problem since 1989 reform, no community of Interest.

How it works, parent to children, they all have boundaries to work and play in. The councils today need to retreat into there new boundaries before they all disappear. There plans have failed, are fill with faults, and are dreaming about how much money they think they get, all have been misled, since 1989 reforms?

The Queen stated do not be there with that little anus hobbles, her little itch has not supported the correct change at all.

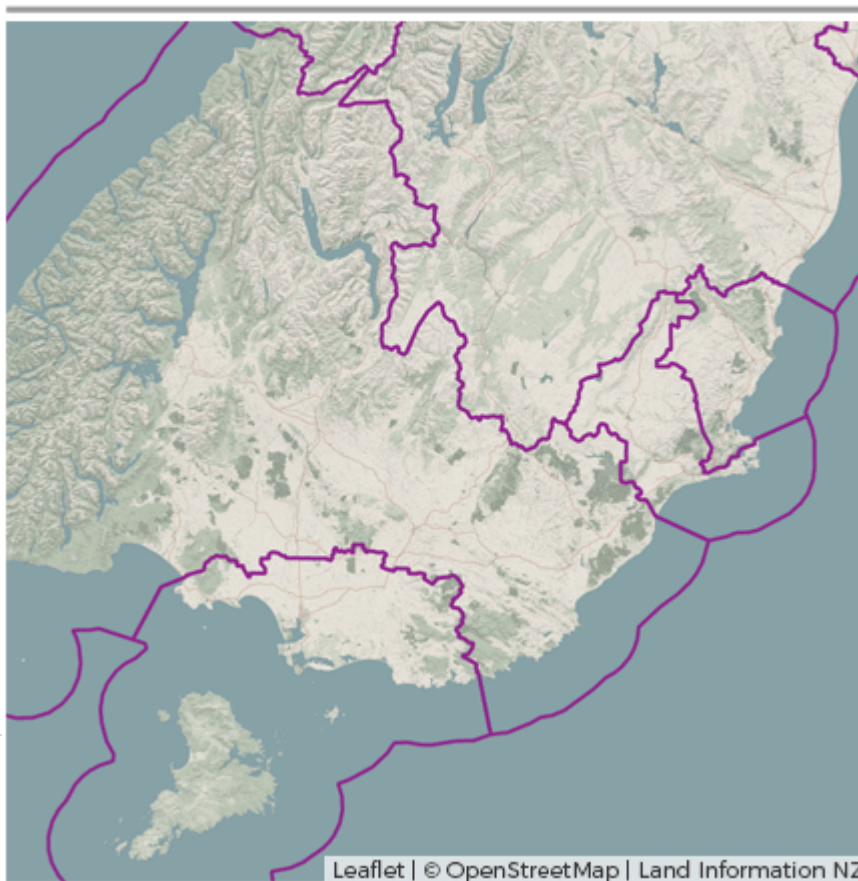

How it WORKS, have an idea, seek advice, complete a business plan, complete education courses to have the skill set to understand the process?

The client has been strung along as they plan for others with more dosh. They in turn can't afford to pay their account so they are advised to on sell to others who have even more funding, it go on and on till it ends up new boundaries to work and play in. What are the new uniforms going to be?

The Otago plans in part for Clyde need to be handed to the new administration the Southern team.

OTAGO AND SOUTHLAND GENERAL ELECTORATES

2014 boundaries

- Clutha-Southland becomes Southland

CLUTHA-SOUTHLAND Code Name Electoral population Variation from quota (number) Variation from quota (%) Projected variation 2023 S15 Clutha-Southland 64,228 -1,230 -1.9% -1% General description The Clutha-Southland electorate comprises the Southland District and Gore District (but excludes Winton, Invercargill City and Bluff) and parts of the Queenstown-Lakes District and Central Otago District. It includes the communities of Clinton, Raes Junction, Roxburgh, Alexandra, Clyde, Arrowtown, Queenstown and Te Anau.

Summary of reasons Clutha-Southland is 7.9% above quota and must lose population. The south Otago area including Milton, Balclutha, Kaitangata and Lawrence with a population of 12,200 moves to Dunedin South. Populations of 3,500 around Winton and 1,000 in The Catlins area move to Invercargill. To balance other changes in the Otago region, Clutha-Southland gains population of 10,300 from over quota Waitaki through an area from Raes Junction, Millers Flat, Roxburgh, Alexandra, to Clyde.

We all suggest that the new administration start with the Clyde plan to support the Vincent Community Board at Dairy creek with the upper Clutha power project as a starting point. Close the Clyde Hill till the dust settles.

The world has never understood the lack of leadership, as they all no what to do, start with the Clyde Plan, the fire chief, district health nurse, school principle, NZED Iwi, community police and interested groups.

NOT the Bank of New Zealand, Kiwi Bank, National Bank ANZ, ACC who have all form clients to rip the old Clyde People of.

Easy to understand.

Not the best idea to start with the Earnsclough Station side, as the brat pack of Earnsclough, the brats from Alexandra plan for a take over.

They all need to bow down, accept the correct change, and move on, they losses ar only money, a 0 interest rate no thanks to the reserve bank, when all interest rates should be 8% and all have a house to live in.

Its that EASY. Signed

On behalf of the old Clyde Interested group who did not have a community of interest BUT where hoodwink, the status quo
