Subject: CERPS Reference Group

Kia ora Anita and RPS Policy

Team,

After much reading and research; I've come to the conclusion the landward policy is covered well and in some areas the actual seaward extent ie 12 nautical miles is addressed. The Issue is pg 109 CE-P2 Coastal Environment Identity should include The seaward extent ,extends out to the 12 nautical mile limit as in pg 113 M1. There should be mapping done similar to the land, as in overlays identifying areas set aside for full or partial protection of marine biodiversity under legislation; Southern Inshore fisheries input ,location of sewage outlets in the sea; marine farms added in the future; Marine biodiversity areas ie. Kelp ,penguin foraging..... with integrated input from Niwa, fisheries DOC to form current baseline info. To do justice to Resource Management of Marine Biodiversity in the seaward boundaries; there is a need to create another Policy CE -P14 (note Kai Tahu CE - 13 (5)) Pg113

Monitor & Manage Seaward Coastal

Environment.

Strategy.

the marine environment with inter grated management.

(1) the need for a Monitoring

(2) the need to respect

The reasons for the above Policy would identify seawater quality, provide a baseline for health of the coastal marine area; what trends might be impacting; ORC become proactive not reactive Examples which impact on the public ie restrictions due to pollution (swimming and shellfish collection) Public education on sensitive marine biodiversity habitats and lifecycles Otago coast waters to be highly valued and treasured.
