

IN THE ENVIRONMENT COURT

IN THE MATTER of the Resource Management Act 1991

BETWEEN **FEDERATED FARMERS OF NEW ZEALAND**

Appellant

AND **OTAGO REGIONAL COUNCIL**

Respondent

Form 7

NOTICE OF APPEAL TO ENVIRONMENT COURT AGAINST DECISIONS ON THE PROPOSED OTAGO REGIONAL POLICY STATEMENT

Clause 14(1) of First Schedule, Resource Management Act 1991

Federated Farmers of New Zealand (Inc.)

To: The Registrar
Environment Court
P O Box 2069
Christchurch 8013

Email: jessmae.kingston@justice.govt.nz, Rachel.Gerrand@justice.govt.nz

This Notice is made upon the following grounds:

1. Federated Farmers of New Zealand makes this appeal in respect to submissions on the decision to which this reference relates, that being the Proposed Otago Regional Policy Statement. Federated Farmers made submissions and further submissions on that proposed plan and a copy of both Federated Farmers original submission and further submissions are attached.

2. The Otago Regional Council ("the Respondent") is the regional authority that notified the plan review and made decisions on it. A copy of the decisions that relate to the Federated Farmers New Zealand submissions and appeal is attached.
3. Federated Farmers of New Zealand is not a trade competitor for the purposes of section 308D of the Resource Management Act 1991.
4. The date of the receipt of the decisions by the applicant was 1 October 2016 (*presumed*).

PROVISIONS IN THE PLAN DECISION TO WHICH THE APPEAL RELATES

1.1 Objective 2.2 Kāi Tahu values, interests and customary resources are recognised and provided for

Reasons for Appeal 1.1

- 1.1.1 Federated Farmers initially supported the notified version of this Objective (notified as Objective 1.2);
- 1.1.2 We remain in agreement that the Regional Policy Statement plays an important role in translating Kāi Tahu values, interests and customary resources into the region's regulatory framework;
- 1.1.3 Consequently, we agree that an Objective of this nature is useful for both Kāi Tahu and plan users;
- 1.1.4 However, the subsequent amendments create concerns around how the proposed Objective will be implemented through the PRPS, particularly what the interaction between 'provided for' and 'interests' will mean for other resource users;
- 1.1.5 This is particularly a concern if 'interests' are taken to include 'commercial interests' with the subsequent implication that Kāi Tahu commercial interests are afforded greater weighting in resource management decisions against other potential competing interests.

Relief Sought

Federated Farmers seeks the following relief:

- 1.1.6 Objective 2.2 – that an advice note, footnote or definition is provided to clarify how 'interests' should be considered in implementation of the PRPS.
- 1.1.7 Objective 2.2 – is amended as follows (or words to similar effect): *Kāi Tahu values, customary and cultural interests and customary resources are recognised and provided for.*

1.2 Policy 3.1.1 Fresh water

Reasons for Appeal 1.2

- 1.2.1 Federated Farmers initially opposed in part the notified version of the proposed policy, on the basis it should be amended to also specifically provide for the economic and social wellbeing of the Otago region and its inhabitants;
- 1.2.2 Our concerns around the failure of the amended provision to recognise the important of freshwater for economic and social wellbeing remain. In addition, the proposed amendments set a very high bar by requiring that all

of the listed matters in Policies 3.1.1 be achieved all of the time, in every instance;

1.2.3 There is potential for the matters listed to compete with each other. For example, b) requires the maintenance or enhancement of *'the range and extent of habitats provided by fresh water, including the habitat of trout and salmon'*;

1.2.4 We consider this is too heavily weighted in favour of Trout and Salmon, which are introduced species that can predate on indigenous species. As a result, there is potential that in providing for these species as sought through policy 3.1.1b, the policy may undermine the viability of indigenous fish species as sought through proposed policy 3.1.1c.

Relief Sought

Federated Farmers seeks the following relief.

1.2.5 Policy 3.1.1 is amended as follows (or words to similar effect): *(b) Maintain or enhance the range and extent of habitats provided by fresh water, including the habitat of trout and salmon;*

1.2.6 An additional provision is added to Policy 3.1.1 as follows (or words to similar effect): *(n) Provide for the economic and social wellbeing of the Otago region and its inhabitants.*

1.3 Policy 3.1.2 Beds of rivers, lakes, wetlands, and their margins

Reasons for Appeal 1.3

1.3.1 Federated Farmers accepts that riparian vegetation provides important ecosystem services to rivers, lakes and wetlands. However, the requirement to maintain or enhance under proposed provisions (d) and (e) may inhibit what farmers can do around waterways and wetlands;

1.3.2 The proposed wording, 'maintain or enhance', in addition to the requirement to 'achieve all of the following' matters listed in the policy, sets a high bar for land use in proximity to these areas and does not provide for 'active management' of these areas in proximity to rivers, lakes and wetlands. A more enabling approach may provide more flexibility for land managers while still delivering the desired range of ecosystem services and environmental outcomes.

Relief Sought

Federated Farmers seeks the following relief.

1.3.3 Policy 3.1.2 is amended as follows (or words to similar effect):

Manage the beds of rivers, lakes, wetlands, their margins, and riparian vegetation to achieve all of the following:
d) *Maintain or enhance overall natural character;*
e) *Maintain or enhance overall amenity values;*

1.4 Policy 3.1.3 Water allocation and use

Reasons for Appeal 1.4

- 1.4.1 Federated Farmers agrees with the overall intention that water users should be required to demonstrate, to a reasonable extent, the efficient use of allocated water. However, we are concerned that there are issues with the accuracy with which (or methods a council may use to define and delineate) 'efficient use' of water. For example, spray irrigation may appear to be a more efficient use on paper, but flood irrigation may provide overall better environmental benefit through aquifer recharge;
- 1.4.2 Further, if the policy results in water users being required to spend significant amounts of money on new irrigation infrastructure, then this may not result in either a net economic or environmental benefit, or create net efficient usage of the water resource.

Relief Sought

Federated Farmers seeks the following relief.

- 1.4.3 Policy 3.1.3 is amended as follows (or words to similar effect):
b) Encouraging the development or upgrade of infrastructure that increases use efficiency, where the environmental or economic benefits of such an upgrade outweigh the economic costs.

1.5 Policy 3.1.9 Ecosystems and indigenous biological diversity

Reasons for Appeal 1.5

- 1.5.1 Federated Farmers considers that proposed policy 3.1.9 (c) does not provide for instances where areas previously under pasture have been subject to regrowth, particularly on extensive, low intensity farming systems;
- 1.5.2 While this concern is partially addressed through inclusion of the word 'predominantly' within this policy; this is not defined in the PRPS and

therefore may be subject to individual interpretation through lower level planning documents;

- 1.5.3 In respect to proposed policy 3.1.9 (f), there is no clarity around how the interests of indigenous species will be weighed against the interests of introduced species, given the latter may predate upon the former.

Relief Sought

Federated Farmers seeks the following relief.

- 1.5.4 Policy 3.1.9 is amended as follows (or words to similar effect):

c) Maintain or enhance areas of predominantly indigenous vegetation, excluding regrowth in pasture;

and:

f) Maintain or enhance habitats of indigenous species ~~and the habitat of trout and salmon~~ that are important for recreational, commercial, cultural or customary purposes;

...or that an advice note is added to provide clarity around how the interests of indigenous species will be balanced against those of introduced species, where these may be in conflict.

1.6 Policy 4.3.1 Managing infrastructure activities

Reasons for Appeal 1.6

- 1.6.1 Federated Farmers opposes the use of the word 'protect' in proposed policy 4.3.1 (e), combined with the proposal that councils should provide for these needs 'now and in the future', and the reference to 'corridors';
- 1.6.2 Our concerns primarily relate to electricity transmission infrastructure situated on private land; and the potential that implementation of this policy may undermine the rights of, or increase the imposition placed upon, landowners housing these assets, thereby undermining the landowner's ability to make land use decisions in proximity to infrastructure;
- 1.6.3 Given this policy will primarily be implemented through the district planning process, it is unnecessary for the PRPS to attempt to balance competing interests or specify how these matters may be addressed through the PRPS.

Relief Sought

Federated Farmers seeks the following relief.

- 1.6.4 Policy 4.3.1 e) is deleted, with the matter considered through district planning processes.

1.7 Policy 4.3.2 Nationally and regionally significant infrastructure

Reasons for Appeal 1.7

- 1.7.1 Federated Farmers considers that, in respect to electricity transmission infrastructure specifically, the question around what may be considered nationally or regionally significant has largely been addressed through the National Policy Statement for Electricity Transmission (NPSET);
- 1.7.2 Consequently, we consider that in respect to electricity transmission infrastructure, Policy 4.3.2 (e) should be refined to refer only to the 'National Grid', excluding electricity transmission infrastructure that is not a component of the national grid;
- 1.7.3 Our concerns primarily relate to electricity transmission infrastructure situated on private land; and the potential that implementation of this policy may undermine the rights of, or increase the imposition placed upon, landowners housing these assets, thereby undermining the landowner's ability to make land use decisions in proximity to infrastructure;
- 1.7.4 Our concerns hinge around the accuracy of the definition of 'Electricity transmission infrastructure'; we consider it would be more efficient and simpler to understand if the term 'National Grid' was used in this proposed policy to provide alignment between the PRPS and the NPSET;
- 1.7.5 Further, Policy 4.3.2 is to be given effect to through Method 4.1.14, including (c) *providing controls on subdivision and land use, as necessary to ensure that the operation, maintenance, upgrading and development of electricity transmission infrastructure is not compromised as a result of the adverse effects of incompatible land uses (including structures).*
- 1.7.6 Federated Farmers considers that farming activities are not incompatible with transmission infrastructure development. However, we consider that upgrading and development should be treated as separate to operation and maintenance, given that upgrading and development may have some adverse impact on surrounding land uses and these should be appropriately weighted and considered.

Relief Sought

Federated Farmers seeks the following relief.

- 1.7.7 Policy 4.3.2 b) is amended as follows (or words to similar effect):

b) ~~*The National Grid Electricity transmission infrastructure;*~~

... with consequential amendments made to the definitions pertaining to Electricity Transmission Infrastructure.

- 1.7.8 Method 4.1.14 c) is amended as follows (or words to similar effect):
c. providing controls on subdivision and land use, as necessary to ensure that the operation, and maintenance, ~~upgrading and development~~ of electricity transmission infrastructure is not

compromised as a result of the adverse effects of incompatible land uses (including structures).

1.8 Policy 4.4.3 Protecting renewable electricity generation

Reasons for Appeal 1.8

- 1.8.1 Federated Farmers is concerned that the policy, as currently worded, may result in water allocation processes favouring electricity generation over other potential uses, irrespective of the relative weighting and community outcomes derived from alternative use;
- 1.8.2 This is particularly a concern given the 'high level' nature of the PRPS in the regional resource management planning hierarchy.

Relief Sought

Federated Farmers seeks the following relief.

- 1.8.3 Policy 4.4.3 is deleted, or amended to specify that the policy is not intended to provide direction in respect to decisions around freshwater allocation.

1.9 Policy 4.4.5 Electricity distribution infrastructure

Reasons for Appeal 1.9

- 1.9.1 Federated Farmers is concerned that the policy fails to recognise the adverse impact that electricity transmission infrastructure may have on adjoining, competing or otherwise compatible land use;
- 1.9.2 Our concerns primarily relate to electricity transmission infrastructure situated on private land; and the potential that implementation of this policy may undervalue the potential adverse impacts upon, or value derived from, primary production activities in proximity to or upon land occupied by electricity distribution infrastructure;
- 1.9.3 This impact is particularly relevant given the intention is to 'protect' the generating capacity of nationally or regionally significant renewable electricity generation activities.

Relief Sought

Federated Farmers seeks the following relief.

- 1.9.4 Policy 4.4.5 is amended as follows (or words to similar effect);
~~Protect~~ Provide for the generating capacity of nationally or regionally significant renewable electricity generation activities, by all of the following:

- a) *Recognising the functional ~~needs~~ constraints of electricity distribution activities;*
- b) *Restricting the establishment of incompatible activities ~~that may result in reverse sensitivity effects~~;*
- c) *Avoiding, remedying or mitigating adverse effects from other activities on the functional needs of that infrastructure;*
- d) *Protecting existing distribution corridors for infrastructure needs, ~~now and for the future~~.*

1.10 Policy 5.3.1 Rural activities

Reasons for Appeal 1.10

- 1.10.1 Federated Farmers wholly supports the intention of this policy. However, we consider the regulatory bar for the potential loss of productive soils is set relatively low for a Regional Policy Statement, and the implication may be restrictions on relatively insignificant land use where this may pose some risk to the loss of soils, either directly or indirectly;
- 1.10.2 We consider the matter is better addressed through the specific district planning processes of Otago's territorial local authorities.

Relief Sought

Federated Farmers seeks the following relief.

- 1.10.3 Policy 5.3.1 is amended as follows (or words to similar effect):
 - b) *~~Minimising~~ Recognising the loss value of significant soils;*

1.11 Policy 5.4.3 Precautionary approach

Reasons for Appeal 1.11

- 1.11.1 Federated Farmers is concerned that the 'precautionary approach' runs considerable risk of being implemented through an overly regulatory or risk averse approach to regulation, in the absence of perfect information. This is particularly concerning given the varying and interacting nature of the natural environment;
- 1.11.2 We would rather the PRPS focusses on addressing information gaps where necessary, and otherwise attempt to provide a resource management framework which seeks to make the best decisions from the information available, recognising the significant opportunity cost if resource use is unnecessarily restricted.

Relief Sought

Federated Farmers seeks the following relief.

1.11.3 Policy 5.4.3 is amended as follows (or words to similar effect):

5.4.3.1 Apply a precautionary approach to *Identify* activities where adverse effects may be *either currently uncertain, not able to be determined, or poorly understood, but are potentially likely to be irreversible and significant.*

And, an additional policy is added:

5.4.3.2 *Prioritise these areas of uncertainty or poor understanding through a coherent integrated framework including risk identification, probability/impact assessment, and cost benefit analysis of options.*

1.12 AER 3.1 Water bodies support healthy ecosystems, are safe for swimming, and maintain their natural form and character

Reasons for Appeal 1.12

1.12.1 The Otago Water Plan addresses freshwater quality in the region, and the proposed AER goes beyond the requirements outlined in the water plan;

1.12.2 While water bodies that are safe for swimming is a welcome outcome, it may not be practically achievable in many instances due in large part to natural occurrences. As a result, a water body specific target for swimmability should be a focus of the Otago water plan, rather than attempting to define this through the PRPS.

Relief Sought

Federated Farmers seeks the following relief.

1.12.3 AER 3.1 is amended as follows (or words to similar effect):

Water bodies support healthy ecosystems, ~~are safe for swimming,~~ and maintain their natural form and character

1.13 Objective 3.2 Otago's significant and highly-valued natural resources are identified, and protected or enhanced

Reasons for Appeal 1.13

1.13.1 The Objective's wording, particularly 'protected and enhanced', set a very high bar, which may not be enabling of or recognise the importance of resource use.

Relief Sought

Federated Farmers seeks the following relief.

1.13.2 Objective 3.2 is amended as follows (or words to similar effect):

Otago's significant and highly-valued natural resources are identified, effectively managed and improved, protected or enhanced where degraded

1.14 Further relief sought

1.14.1 In addition to the matters set out in paragraphs 7 to 13 above, Federated Farmers seeks the following relief:

- (a) Similar and / or consequential amendments to the Proposed RPS (such as to methods, explanatory text and to ensure a consistent approach where appropriate) that would satisfactorily address the matters raised in this appeal; and
- (b) Federated Farmers' submission and further submission relief in the event that its primary relief in this appeal is not granted; and
- (c) Such other relief as the Court considers appropriate.

Address for service of Appellant:

Federated Farmers of New Zealand
PO Box 5242
Dunedin 9058
Attention: David Cooper

Tel: 03 4777 361

Fax: 03 4790 470

Email: dcooper@fedfarm.org.nz

Copies to be sent to:

**Director Policy Planning and Resource Management
Otago Regional Council
Private Bag 1954,
Dunedin 9054.**

Copies to be served on other submitters

Annexure A - List of other affected submitters and addresses and cover letter

Advice to recipients of copy of notice of appeal

How to become party to proceedings

You may become a party to the appeal if you made a submission on the matter of this appeal; and you lodge a notice of your wish to be a party to the proceedings (in form 33) with the Environment Court within 30 working days after this notice was lodged with the Environment Court.

You may apply to the Environment Court under section 281 of the Resource Management Act 1991 for a waiver of the above timing requirements (see form 38).

How to obtain copies of documents relating to appeal

The copy of this notice served on you does not attach a copy of the appellant's submission or the decision (or part of the decision) appealed. These documents may be obtained, on request, from the appellant.

The copy of this notice served on you does not attach a copy of any other documents necessary for the adequate understanding of the appeal (of which there were none), or a list of names and addresses of persons to be served with a copy of this notice. These documents may be obtained, on request, from the appellant.

Advice

If you have any questions about this notice, contact the Environment Court Unit of the Department for Courts in Auckland, Wellington or Christchurch.

Contact details of Environment Court for lodging documents

Documents may be lodged with the Environment Court by lodging them with the Registrar.

The Auckland address of the Environment Court is:

8th Floor, District Court Building
3 Kingston Street
Auckland

Its postal address is:

P O Box 7147
Wellesley Street
Auckland

And its telephone and fax numbers are:

Telephone: (09) 916 9091
Fax: (09) 916 9090

The Wellington address of the Environment Court is:

The District Court Building

43 – 49 Balance Street
Wellington

Its postal address is:
P O Box 5027
Lambton Quay
Wellington

And its telephone and fax numbers are:
Telephone: (04) 918 8300
Fax: (04) 918 8303

The Christchurch address of the Environment Court is:
83 Armagh Street (corner Durham Street)
Christchurch

Its postal address is:
P O Box 2069
Christchurch

And its telephone and fax numbers are:
