

Natural Hazards Database User Guide

Finding a property

Choose a location (use drop down arrow to show all locations) or

Type in an address or valuation number then click on

Legend can be shown or hidden by clicking on

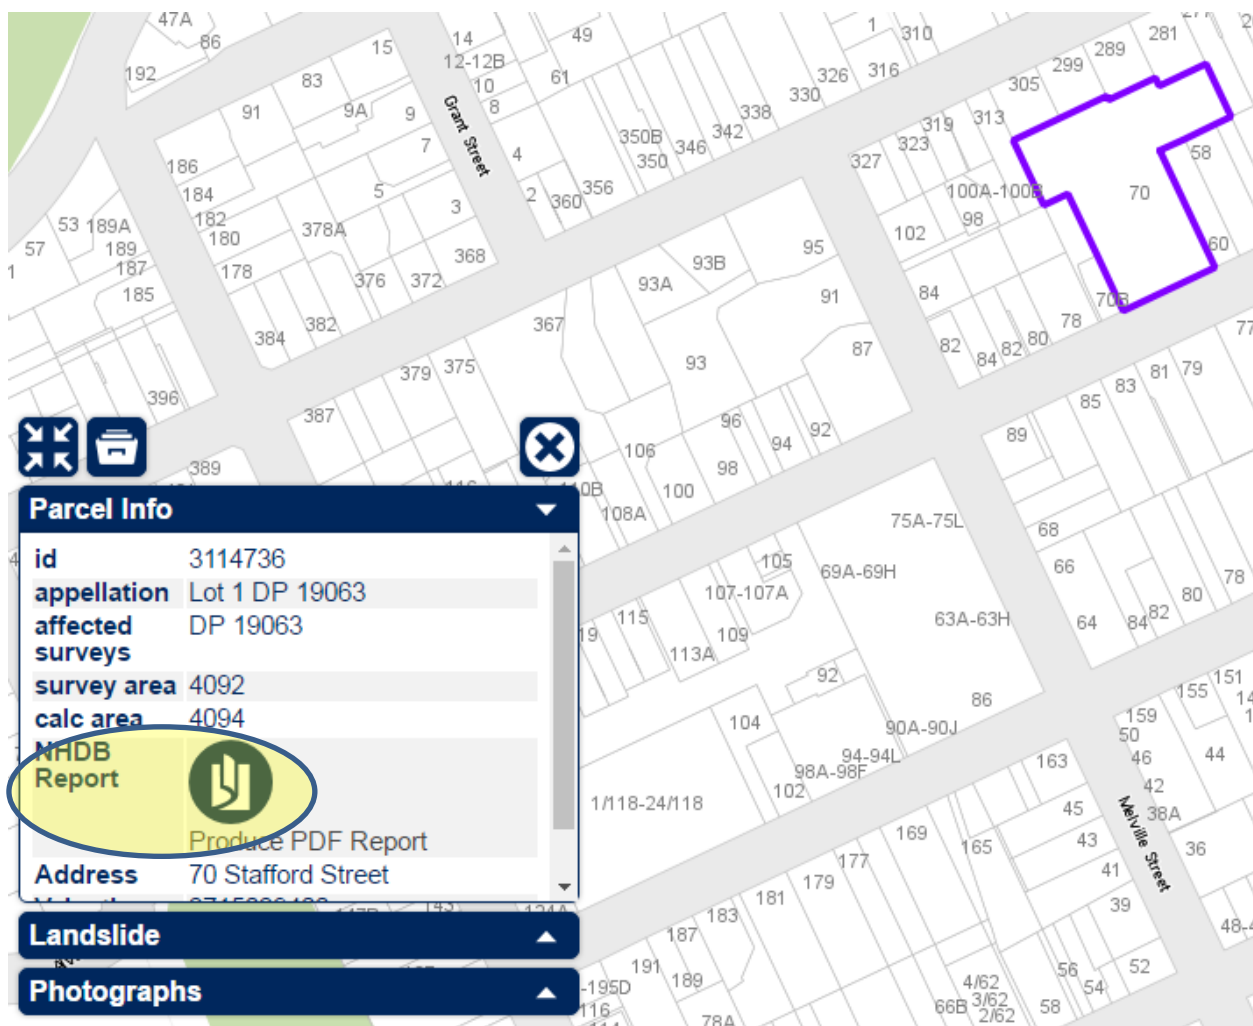

Generating a hazard report for a property

Once you've selected a property a dialogue box will appear containing:

- parcel info
- associated hazard layers (i.e landslide, seismic, flooding)
- photographs

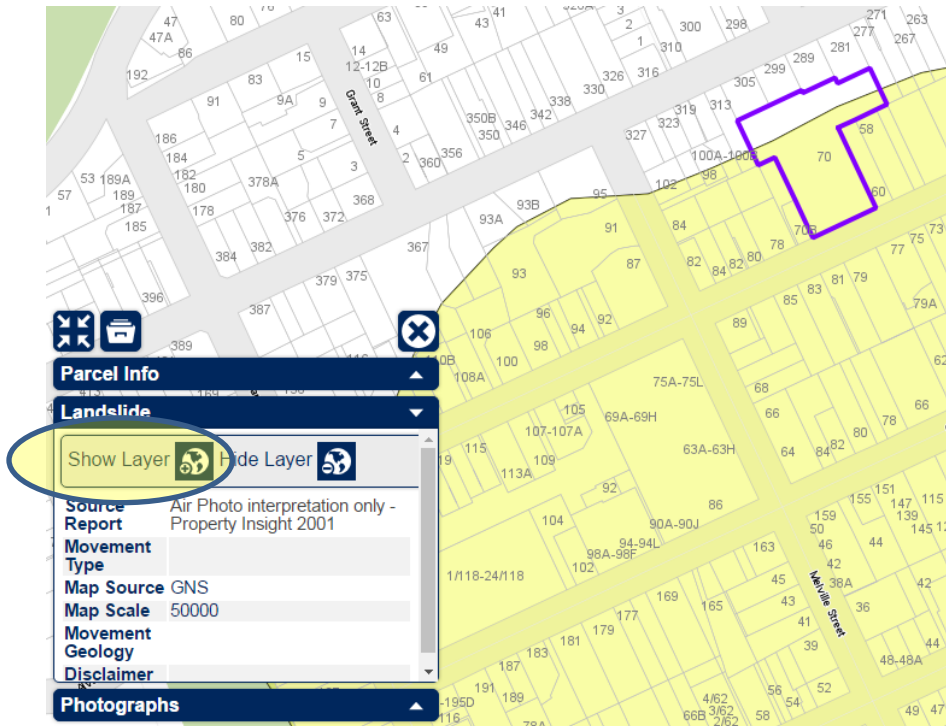

click on  in the *parcel info* box to produce a PDF file containing relevant hazard information for the property

The hazard report is relevant over a general area and is not a substitute for a Land Information Memoranda (LIM). A LIM provides hazard information relating to specific parcels of land and may be obtained from the relevant district/city council.

Viewing the spatial extent of a hazard

Go to hazard and select **Show Layer**  icon

Use +/- to see spatial extent of hazard

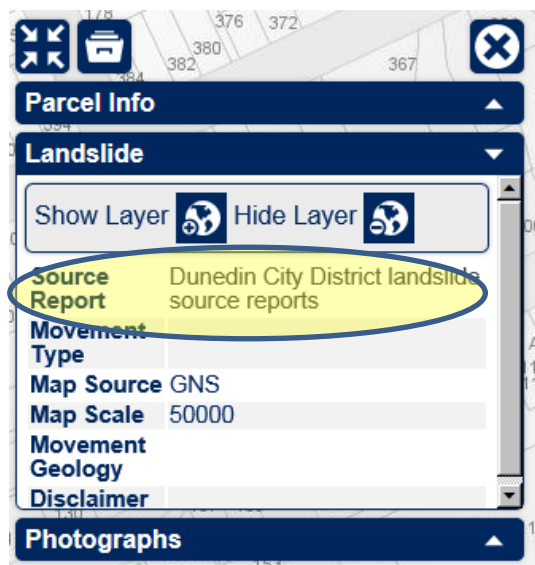

Example of full extent of hazard

Finding information relating to a hazard

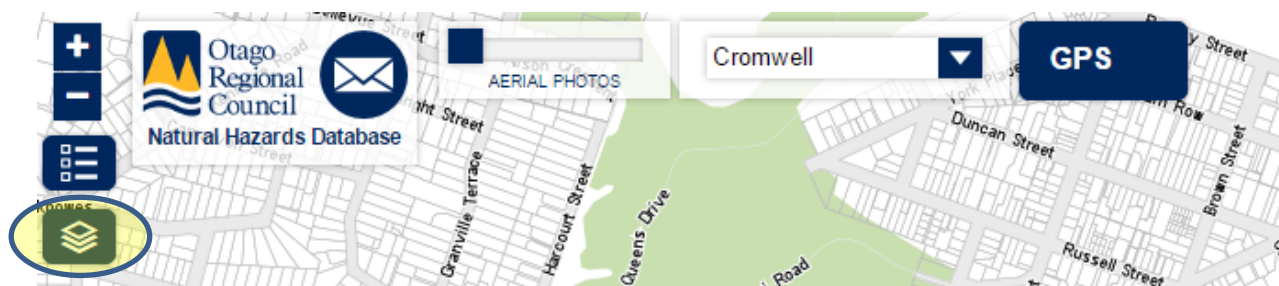

Click Source Report to see a PDF file with information on the selected hazard

Advanced use

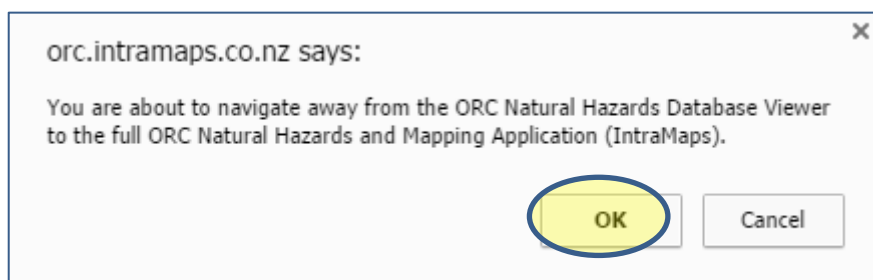

Advanced Use will open the full ORC Natural Hazards and Mapping Application. The application is GPS enabled, with up to date information. It can be used with any web browser and is also iPad friendly.

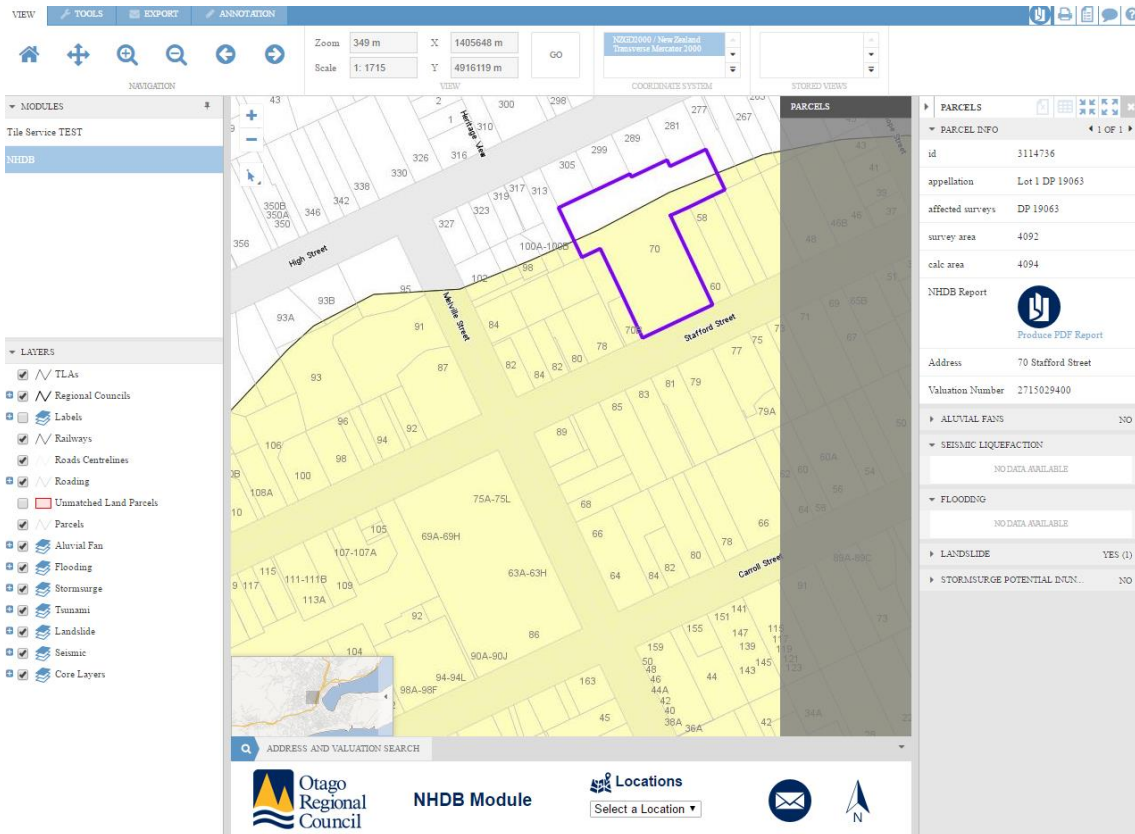

Click on  icon to access the full ORC Natural Hazards and Mapping Application

The following dialogue box will appear, click OK.

The mapping application should now look like this
