

## **Submission on proposed variations to the Otago Southland Regional Land Transport Plan 2015 – 2021**

I believe Ballantyne Rd should be sealed as soon as possible.

As Wanaka grows so will the traffic volumes on alternative routes into town. Currently the recurring corrugations present a safety risk to drivers who are not experienced on gravel roads or who travel in excess of the temporary 50 kmh speed limit.

I live on Ballantyne Rd and use the road both as a motorist and a cyclist. I believe unsealed Ballantyne Rd is unsafe when corrugated, dust is a nuisance and a visibility hazard.

Ballantyne Rd should be sealed in its entirety to ensure all reasonable and practicable steps have been taken to ensure users safety.
