Regionally Vulnerable

Herbfield skink
(*Oligosoma murihiku*)
Regionally Declining

Regional Endemic!

Grand skink
(*Oligosoma grande*)
Regionally Endangered

Regional Endemic!

Otago skink
(*Oligosoma otagense*)
Regionally Endangered

Tuatara
(*Sphenodon punctatus*)
Regionally Extinct

The tuatara became regionally extinct in Otago >200 years ago, but was reintroduced to Orokonui Ecosanctuary – Te Korowai o Mihiwaka, in 2012. The long-term success of this translocation is yet to be determined.
