Application Number: RM25.206

Purpose: Disposal of treated wastewater to water from a wastewater treatment plant and to construct a riprap outfall structure in the bed of the Shotover River/Kimiākau

☒ I am submitting on **both** consent applications.

The specific parts of the application/s that my submission relates to are: *(Give details)*

Gravel extraction and channel diversion – what effect could this have on our commercial operations.

My/Our submission is *(include: whether you support or oppose the application or specific parts of it, whether you are neutral regarding the application or specific parts of it and the reasons for your views)*.

KJet submission is neutral on discharging treated wastewater to the Shotover river. The disturbance to the bed of the Shotover river to create and maintain a diversion channel requires further clarification.

KJet operates commercial jet boats trips in this area of the Shotover river and changes to the flow and path of the river can impact on our operations in terms of being able to safely undertake our consented jet boat trips on the river.

I/We seek the following decision from the consent authority *(give precise details, including the general nature of any conditions sought)*

KJet request a detailed plan when river levels change (eg high or low water levels), river running true left (the furthest point from the diversion channel). Communication with KJet to mitigate any interruption to business.

High water levels (flooding) diversion channel filling with river gravel.

Low water levels – not enough water flowing causing the diversion channel to dry up. Requiring more water from the main flow.
